

**REMARKS**

The present application has been amended to place it in better condition for examination and allowance. No new matter has been introduced. Favorable reconsideration is respectfully requested.

Election of the circle shape depicted in Figures 1, 4, 8, and 20 (claims 2, 3, 5, 8-10, 12-14, 17 and 23-32), the fold arrangements of Figures 10 and 11 (claims 2, 3, 5, 8-10, 12-14, 17 and 23-32) and the dispenser in Figure 14 (claims 12-14) are hereby elected subject to traverse. Thus, claims 2, 3, 5, 8-10, 12-14, 17 and 23-32 should be examined in this application.

Other than the existence of more than one embodiment, the Examiner has not indicated any reason for restriction. From a simple review of issued patents, claims directed to multiple embodiments are often included, and the mere existence of multiple embodiments is not a basis for restriction. In this regard, the Examiner has not indicated that the fields of search are different, that any extra effort would be required for searching or examination, or the like.

Thus, for patent office economics and efficiencies, the restriction requirement should be withdrawn.

Favorable reconsideration and allowance are respectfully requested.

**Respectfully Submitted,  
Oday Abbosh et al.**
